City Manager Crow & City Council:

Re: Fire Department Personal Protective Clothing- Turnout Gear

The Freeport Fire Department has conducted research utilizing a committee of management and union personnel to look at specifications for the purchase and replacement of current firefighter turnout gear. The committee was present for five demonstrations given by manufacturers which laid out the newest technologies for firefighter structural protective gear. Upon completion of the demonstrations, the committee put together specifications for new gear that met their parameters for what a firefighter needs in the City of Freeport.

When the specifications went out to the five manufacturers for bid, four returned the bids and only one met the exact specifications as presented. All four manufacturers' bids were under the monetary amount originally considered when budgeting. In addition, all four bids were within \$276 of each other. The committee's choice for gear replacement was the Cairns Globe gear that is sold by Dinges Fire Equipment out of Polo, IL. This gear was not the low bid and was not the high bid, and is \$246 more per set than the low bid. I am recommending the purchase of 23 sets of turnout gear from Dinges at the cost of \$50,945 based on the following reasons:

- Dinges met all specifications the labor/management committee specified, where the other manufacturers did not meet exact specifications.
- Dinges sells Cairns Globe gear which has been the gear of choice for Freeport Fire Department for over twenty years. The old, outdated gear is Cairns Globe gear which has been a proven product here in Freeport and has taken the wear and tear very well over the years.

Thank you,
